

Presentati i 10 progetti “most controversial” di RepRisk

23 Mar 2018

RepRisk ha presentato il report “Most Controversial Projects of 2017”. L’analisi, come ogni anno, si focalizza su **10 progetti** che sono stati i più esposti a rischi Esg e di condotta nel corso dell’ultimo esercizio. La lista include pipeline, impianti di energia, complessi residenziali e retail. E i Paesi coinvolti, oltre a Cina, Nigeria e Siria, sono anche Usa, Germania, Russia e Regno Unito. Tutto questo, spiega RepRisk, significa che **non ci sono settori o ambiti geografici immuni dal rischio**.

Overview and ranking

MCP 2017 ranking ¹	Project name	Peak RRI in 2017 ²	Sector	Location

#8	Changwon Jinhae Shipyard	58	Industrial Engineering	South Korea
#9	Guangzhou No 7 Thermal Power Plant	57	Utilities	China
#10	Imperial Pacific Resort Hotel	57	Travel and Leisure	USA

1 The most controversial projects are primarily selected based on their Peak RepRisk Index (RRI). Should companies have the same Peak RRI, the projects will be ranked based on the number of severe and very severe risk incidents in the given year. RepRisk may have chosen to exclude projects if they were extensively covered in previous reports and no new developments were reported in the previous two years.
