RepRisk data used in the company evaluation for Ethisphere’s 2017 World’s Most Ethical Companies

March 2017

The Ethisphere Institute announced the 2017 World’s Most Ethical Companies. The annual recognition issued by Ethisphere recognizes those companies who align principle with action, work tirelessly to make trust part of their corporate DNA, and in doing so, shape future industry standards by introducing tomorrow’s best practices today.

RepRisk is proud of the important role of its data in the evaluation process for this respected designation since 2015. RepRisk’s data and research contributed to the Leadership, Innovation, and Reputation scoring portion of the Ethics Quotient™ survey, the underlying framework for the World’s Most Ethical Companies designation.

“We’re delighted that our data helped support Ethisphere in their mission to drive business ethics globally through the World’s Most Ethical Companies process,” states Alexandra Mihailescu Cichon, Head of Sales and Marketing at RepRisk.

Ethisphere is a global leader in defining and advancing the standards of ethical business practices that fuel corporate character, marketplace trust, and business success. It serves companies worldwide through the provision of advisory and verification services for corporate ethics programs.
