RepRisk adds four languages to its research coverage, bringing the total to 20 languages

Launch of Bahasa Indonesia, Bahasa Malaysia, Filipino, and Hindi enhances coverage of environmental, social, and governance (ESG) risks in South Asia and Southeast Asia

RepRisk, a leading business intelligence provider specialized in ESG and business conduct risks, is proud to announce the addition of Indonesian (Bahasa Indonesia), Malaysian (Bahasa Malaysia), Filipino, and Hindi to its research process. With the addition of these four new languages, RepRisk now covers 20 major business languages as part of its daily-updated ESG risk solutions.

Other languages covered by RepRisk’s research are: English, Arabic, Chinese, Danish, Dutch, Finnish, French, German, Italian, Japanese, Korean, Norwegian, Portuguese, Russian, Spanish, and Swedish.

“Expanding the languages covered by RepRisk is vital to our research process, as risks first appear at a local level in local languages,” says Nicole Streuli-Fürst, Executive Vice President of Operations and Research at RepRisk. “These four additions greatly strengthen our local coverage – and early detection of ESG and business conduct risks – in South Asia and Southeast Asia.”

RepRisk runs the world’s largest due diligence database on ESG and business conduct risks, covering over 110,000 listed and non-listed companies across all sectors and geographies, including emerging and frontier markets.

By combining artificial intelligence with human analysis in 20 languages, RepRisk translates big data into curated and actionable research and metrics that are used in risk management and compliance, investment management, supply chain, and corporate sustainability. Its research captures and analyzes information from media, stakeholders, and other public sources external to a company, taking a unique outside-in approach to assessing a company’s performance.
About RepRisk
