

Expanded Water Risk Monetizer, developed by Ecolab and Trucost, now incorporates RepRisk data

March 2017

Ecolab, Trucost, and Microsoft collaborate to help business address water risks and have expanded the Water Risk Monetizer, a tool that supports businesses respond to water availability and quality challenges.

Among the new features of the tool is the incorporation of RepRisk data. In the risk analysis section of the tool, the Water Risk Monetizer uses data provided by RepRisk to calculate the facility's industry and country RepRisk Risk Exposure scores.
