

RepRisk takes part in Swiss Equity Cleantech Event in Zurich

Swiss Equity Magazine's Cleantech Day took place on Tuesday October 12 in Zurich. RepRisk was invited to participate and was represented by Christophe Diederich, a Senior Analyst. The event was held at the Convention Point of SIX Group, one of RepRisk's partners. Christophe presented the RepRisk tool to attendees who included members of the financial and clean technology industries. All seemed to share the view that supplementing research with third-party data is essential.

It is important for us to keep in touch with the clean tech community, particularly as investors looking into this area are often interested in controlling environmental risks associated with their investments in general. RepRisk thanks swisscleantech and Swiss Equity Magazine for giving us this opportunity to present.
