

## Upcoming Webinar – Improve risk management & carbon performance

Climate performance leaders know that pro-active risk management goes hand-in-hand with strong sustainability performance. Understanding and managing risks related to climate change and resource shortages helps strengthen your reputation and save you money. Firms that are looking to build sustainability leadership positions need to know how risk factors are evaluated by external analysts and investors. In this free webinar Britta Margraf, Business Lead Supply Chain at ESG risk data provider RepRisk, and Jennifer Clipsham, Principal Consultant at thinkstep, will cover these key points:

**Reputational risk analysis:** hear how RepRisk captures the stakeholder perspective on ESG risks, providing a valuable “outsider perspective” when evaluating a company

**Pro-active risk management:** learn how to manage risk with an integrated framework

**Identify hot-spots:** use data analytics to identify risks and manage improvements

Webinar date & time: October 15 2015 – 17:00 PM CEST / 08:00 AM PDT
