RepRisk data incorporated into Ecolab's Water Risk Monetizer

Enabling insights into reputational risks at an industry and country level

RepRisk, a leading provider of research and metrics on ESG risk and business conduct, is pleased to announce that its tailored Industry and Country Risk scores are now available in the risk analysis section of the Water Risk Monetizer developed by Ecolab, a global technology and services company.

On a daily basis, RepRisk leverages big data to identify all the relevant ESG risk. The score captures reputational risks associated with local pollution and water scarcity in a specific location or industry and helps to easily flag high risk areas.

“We’re delighted that our data helps businesses better understand and assess water risks,” states Alexandra Mihailescu Cichon, Member of the Executive Committee of RepRisk. “We believe that enabling informed decision-making is core to responsible business conduct worldwide.”

The RepRisk ESG Risk Platform serves as a due diligence, compliance, and risk monitoring tool for businesses across a wide range of ESG issues. For more information, please visit www.reprisk.com.

The Water Risk Monetizer is a publicly available global water risk tool that helps businesses respond to water availability and quality challenges. It has been developed by Ecolab in partnership with Trucost and Microsoft. For more information, please visit www.ecolab.com.

About RepRisk

RepRisk is a leading business intelligence provider, specializing in environmental, social, and governance (ESG) risk analytics and metrics.

Harnessing a proprietary, systematic framework that leverages cutting-edge technology and hands-on human intelligence in 15 languages, RepRisk curates and delivers dynamic risk information for an unlimited universe of companies.

Since 2006, RepRisk has built and continues to grow the most comprehensive ESG risk database that serves as a due diligence, research, and monitoring tool in risk management, compliance, investment management, corporate benchmarking, and supplier risk control. The RepRisk ESG Risk Platform currently includes risk profiles for over 89,000 listed and non-listed companies, 21,000 projects, as well as for every sector and country in the world.

Headquartered in Zurich, Switzerland, RepRisk serves clients worldwide including global banks, insurance providers, investment managers, and corporates, helping them to manage ESG and reputational risks in day-to-day business.

RepRisk provides the transparency needed to enable better, more informed decisions.
