

RepRisk Monitor Product overview

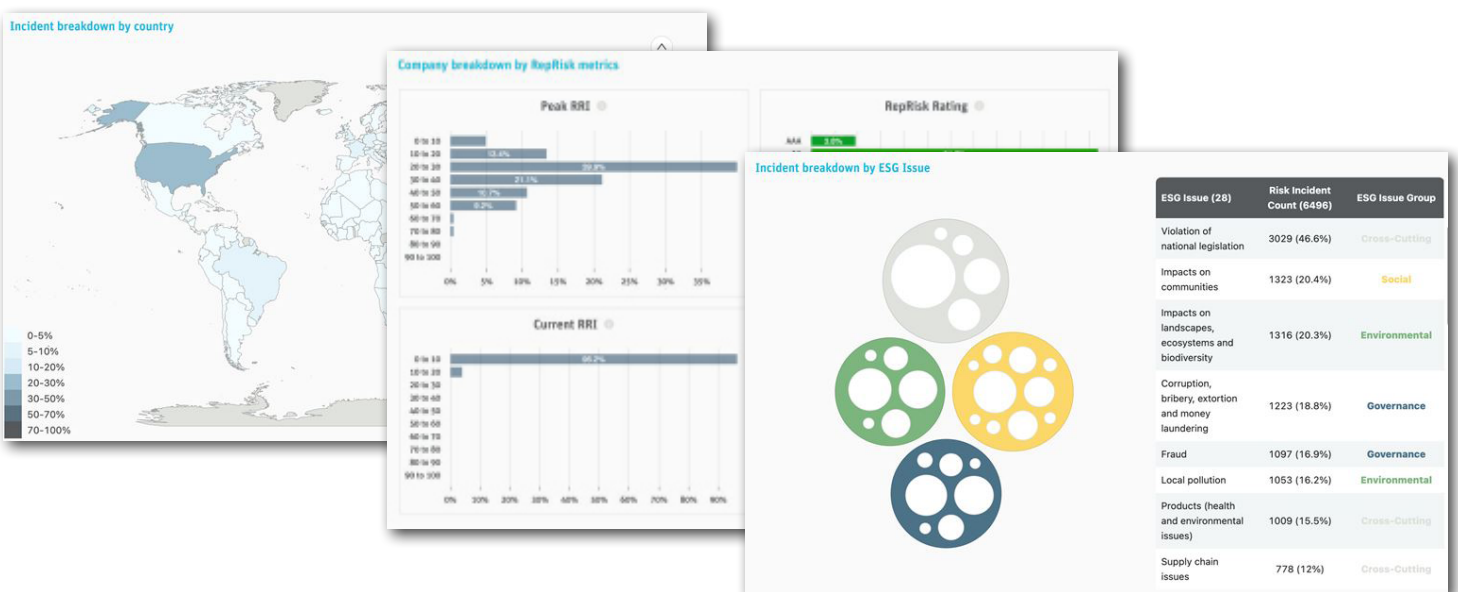

A cutting-edge portfolio monitoring tool

- Efficiently identify, assess, and monitor ESG risks in your portfolio companies on a regular basis
- Empower decision-making on ESG strategies by understanding actual ESG risk incidents
- Create a streamlined channel of communication with internal and external stakeholders
- Create unlimited and comprehensive ESG reports on your portfolios

Why RepRisk?

- Coverage of 205,000+ public and private companies and 55,000+ infrastructure projects across all sectors, and regions, including emerging and frontier markets
- Daily point-in-time data on 101 ESG factors with consistent methodology since 2007
- Leveraging big data via a combination of AI and machine learning together with 150+ analysts in 23 languages for early risk detection

Efficiently and seamlessly create your own custom reports, perform ESG factor analysis to empower decision-making, and apply custom sets of ESG factors to comprehensively identify and monitor ESG risks in your portfolio.
